

1619-21 Wallace Street

Philadelphia, PA

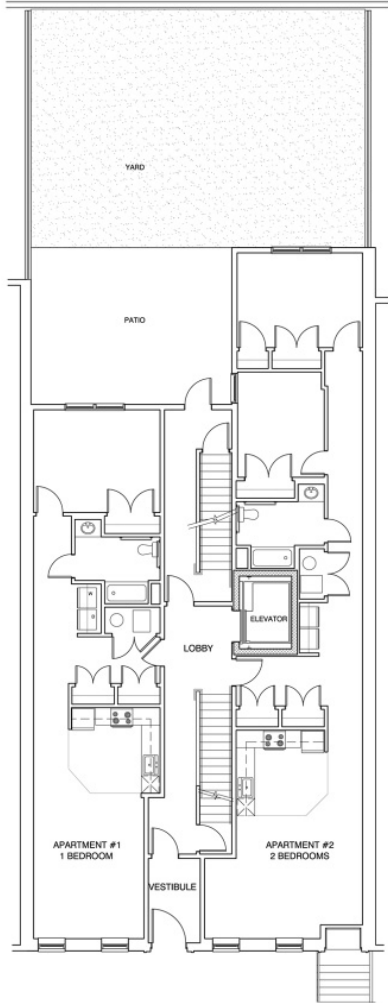

CLIENT:

Spring Garden Community Development Corporation

Vacant lot before

KSK designed this new infill 6-unit elevator access affordable rental apartment building for a double vacant mid-block lot in the Spring Garden National Historic District. The building, designed for seniors, is carefully integrated into the existing building fabric and streetscape of the historic district. The brick-faced building responds to the scale and materials of the adjacent historic rowhouses, and includes a marble base, marble window heads and sills, decorative marble door surrounds, and a carved wood cornice.
