

Huai Rou Culture and Entertainment Center

Beijing, China

CLIENT:
Kuang Xing

KSK served as master planners and urban designers for the development of Huai Rou Mi's Culture and Entertainment Center. The 40 hectare mixed-use center will feature a "main street" of contemporary Chinese gardens lined with retail stores, restaurants, and arts boutiques with residential flats above. Four landmark buildings housing specialized uses will punctuate the development: extreme sports facility, wellness center, aquarium, and indoor "beach."

A village-scaled market place will serve as a transition point to adjacent development sites and provide local residents with affordable places to market goods.
