

# Historic Resources Survey and Brochure

Provincetown, MA

## **CLIENT:**

**Borough of Provincetown**

The Borough of Provincetown hired KSK to perform a historic resources survey for the Provincetown Local Historic District. The survey included reconnaissance-level documentation for 1,200 buildings and intensive-level documentation for 300 buildings. KSK also worked with the Borough of Provincetown and the Provincetown Historical Commission (PHC) to develop a brochure outlining the procedures of the PHC. The brochure was targeted for use by current and potential property owners in the district, and was designed so that it could be mailed as a stand-alone item.

The PHC will utilize the survey data to gain a clear understanding of the present state of the district and its preservation needs. The information will help the Commission to make informed decisions during the design review process.
